

【書類名】 図面

【図1】 Fig. 1

【図2】 Fig. 2

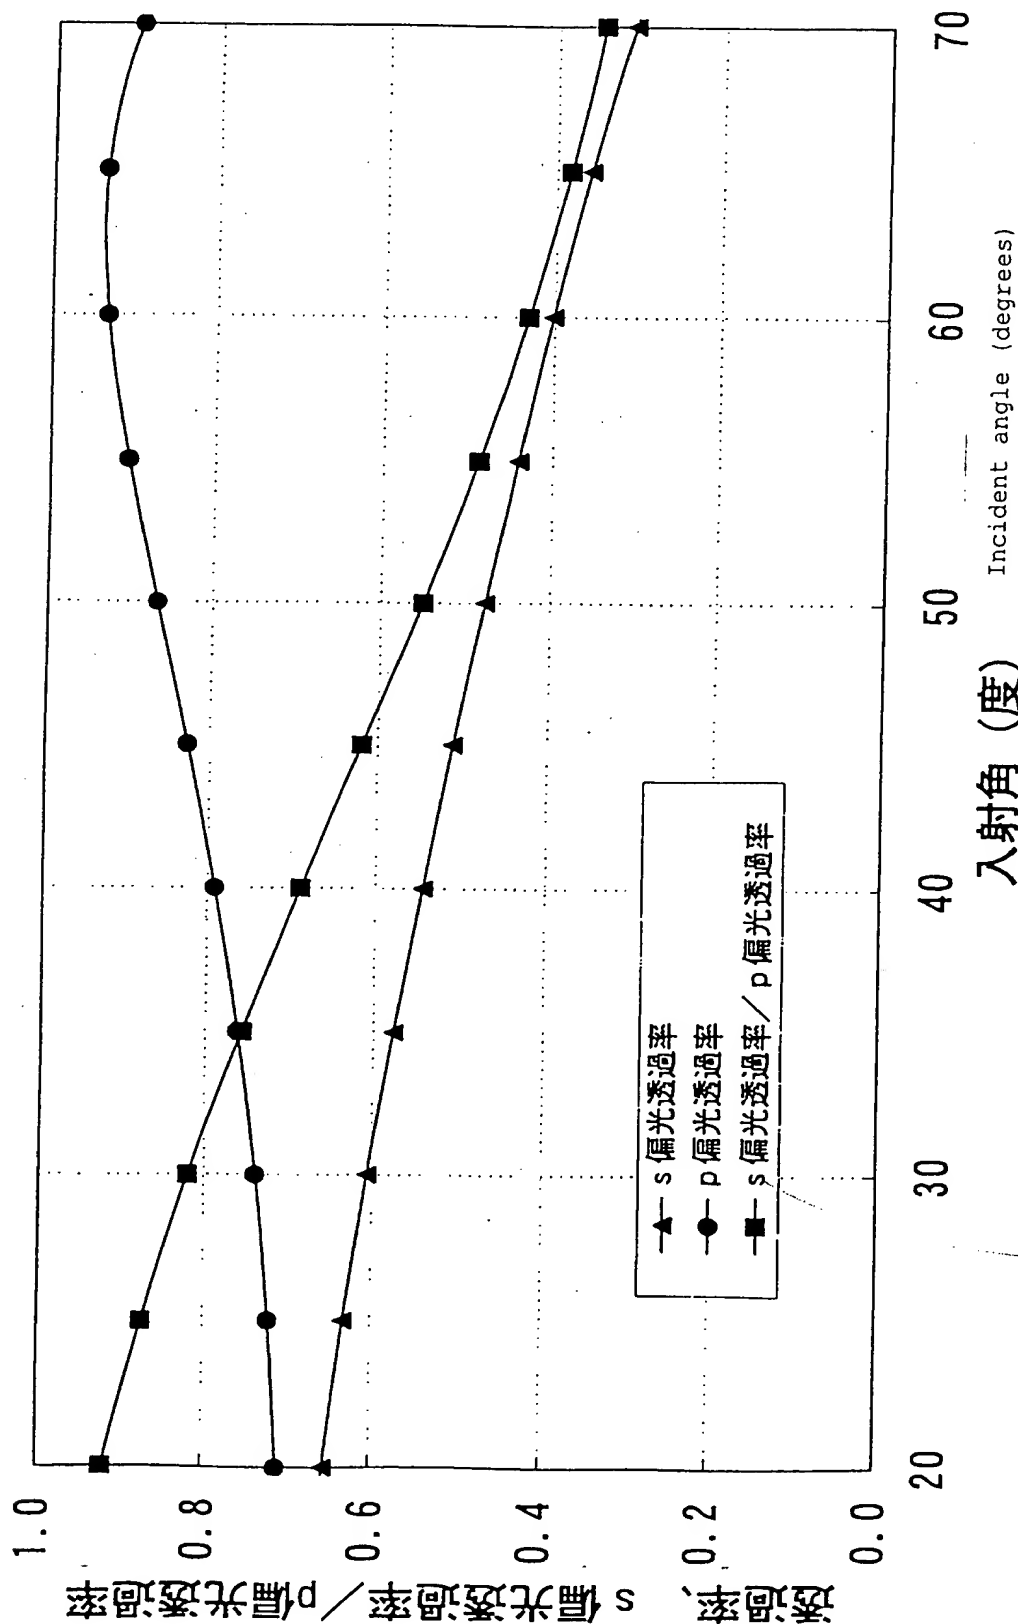

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light

component transmittance

【図3】 Fig. 3

s-polarized light component transmittance

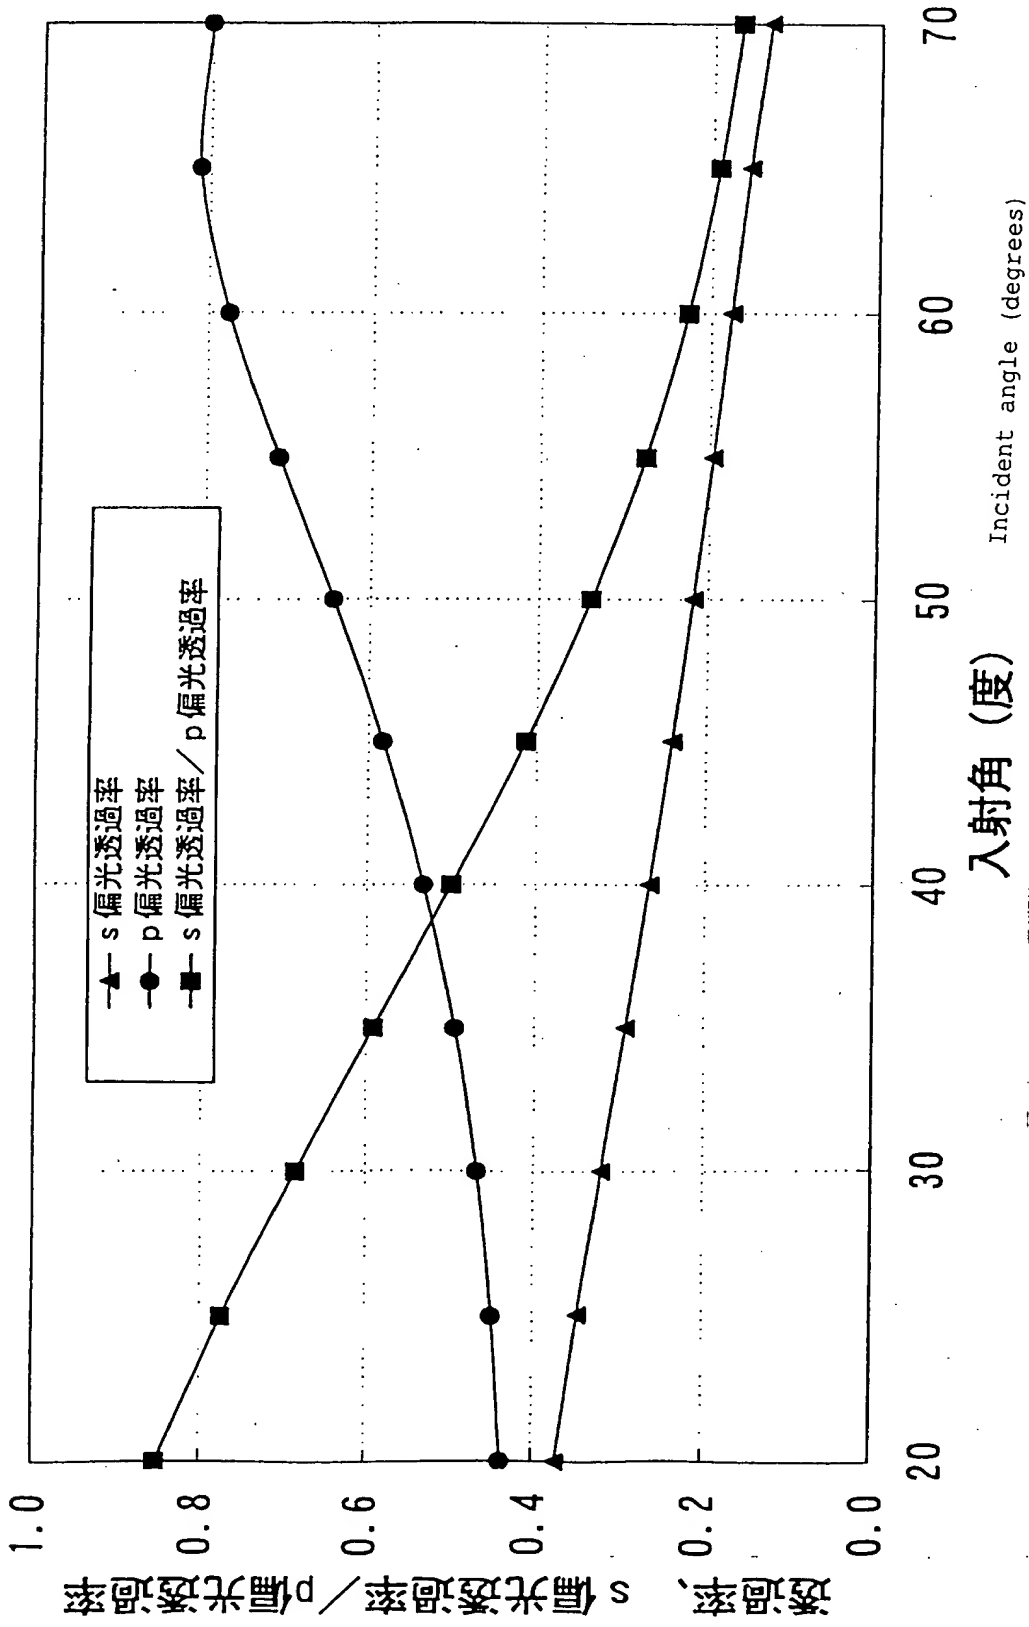

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light

component transmittance

transmittance, s-polarized light component  
transmittance/p-polarized light component transmittance

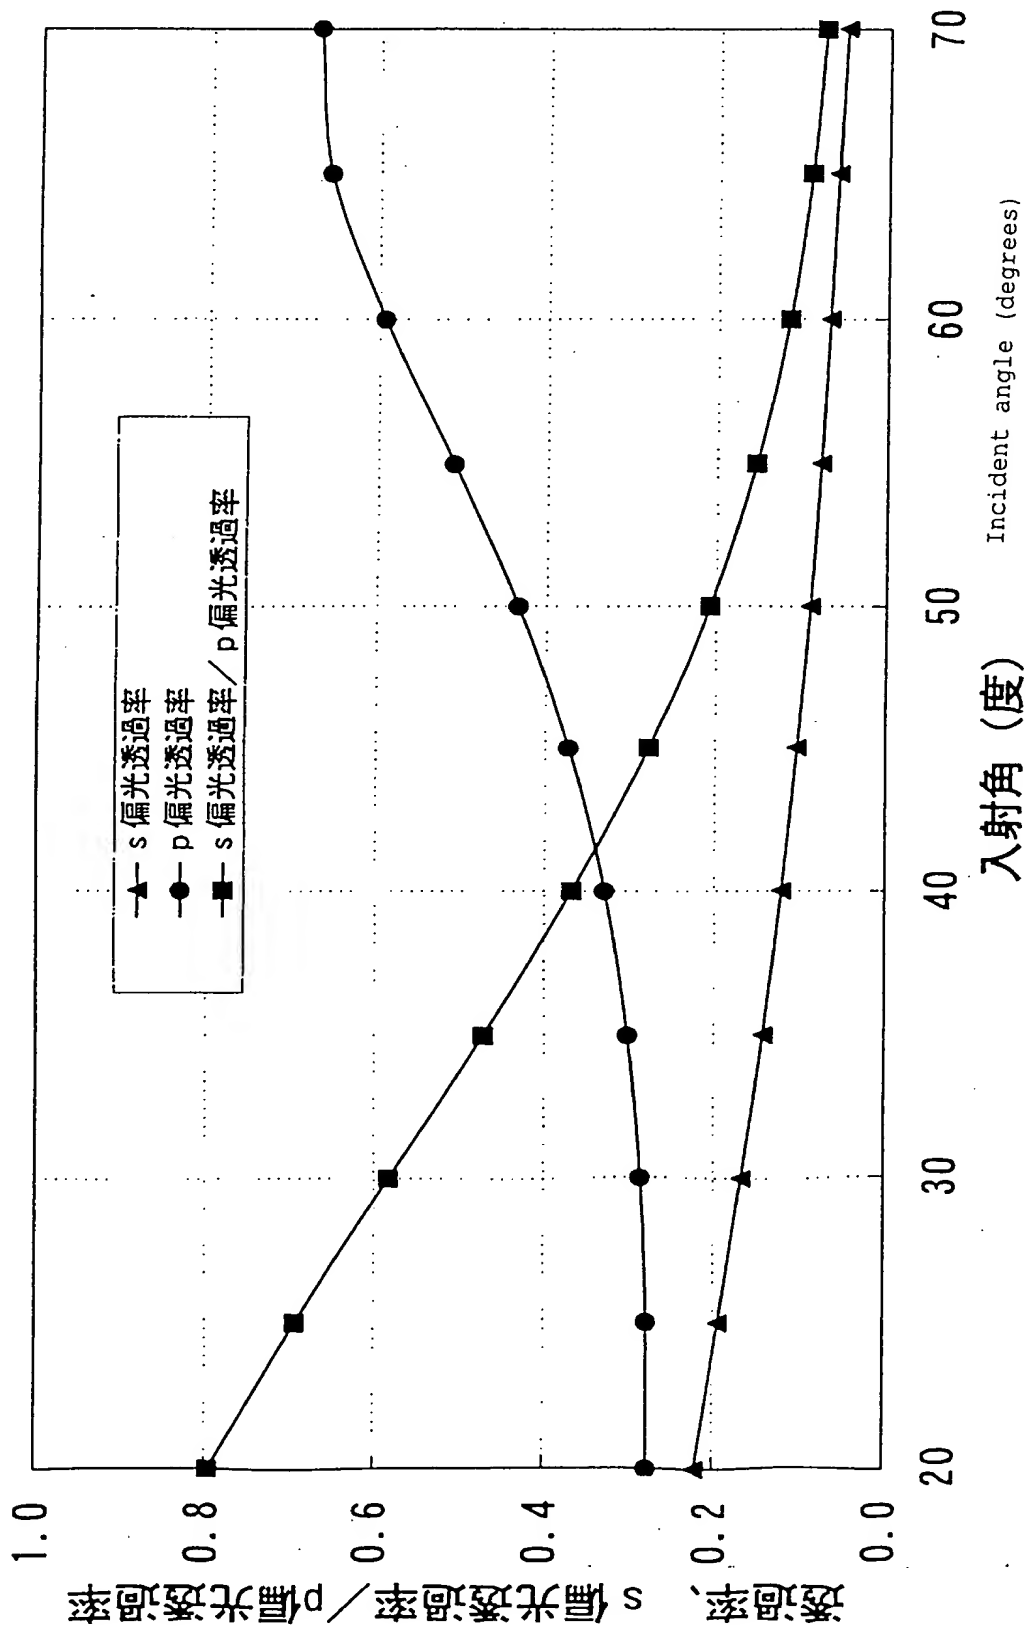

【図4】Fig. 4

transmittance, s-polarized light component  
transmittance/p-polarized light component

s-polarized light component transmittance  
p-polarized light component transmittance  
s-polarized light component transmittance/p-polarized light  
component transmittance

【図5】 Fig. 5

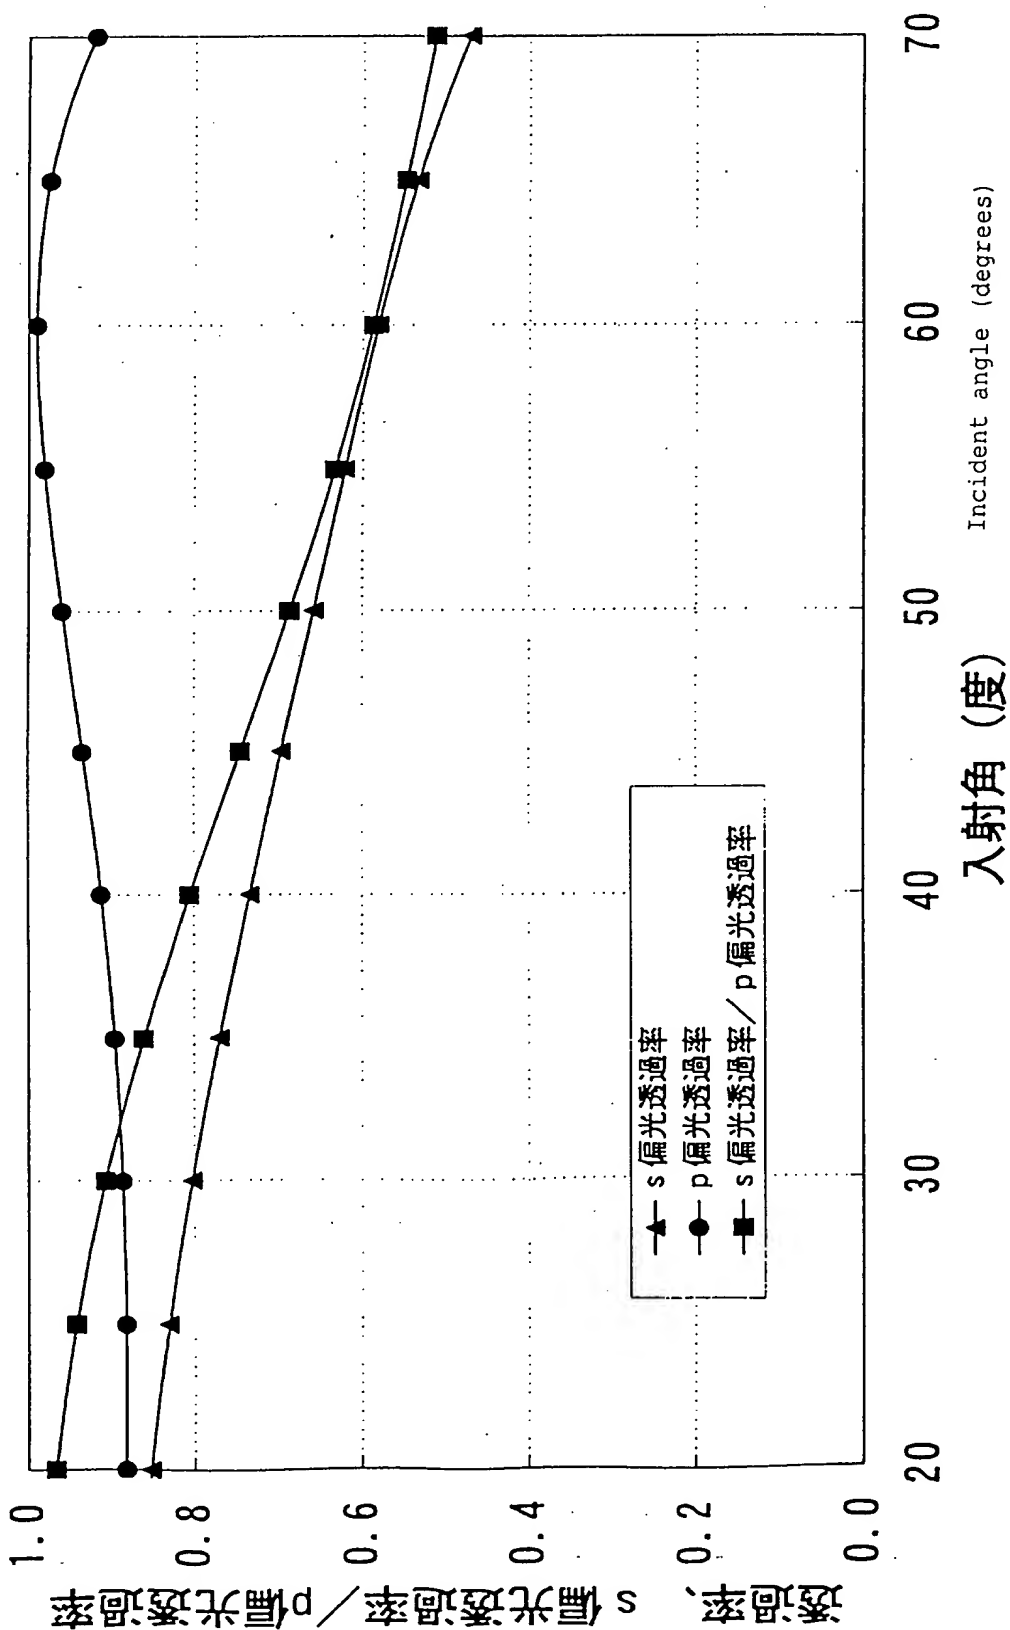

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light

component transmittance

【図6】 Fig. 6

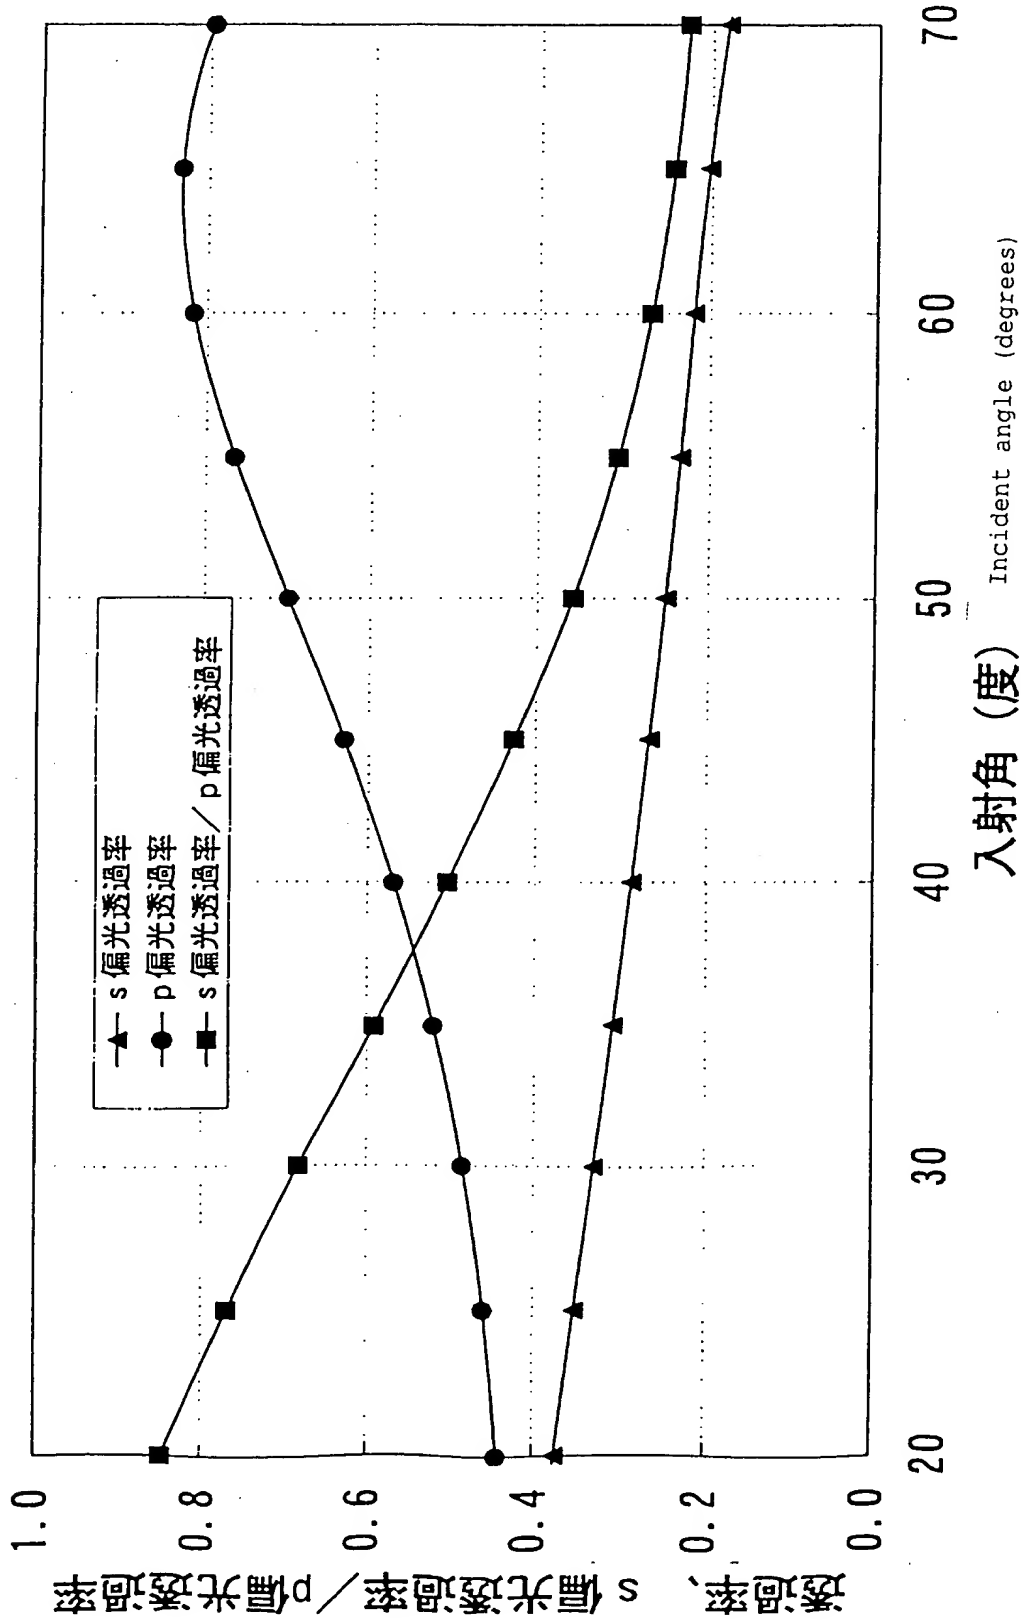

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light

component transmittance

【図7】Fig. 7

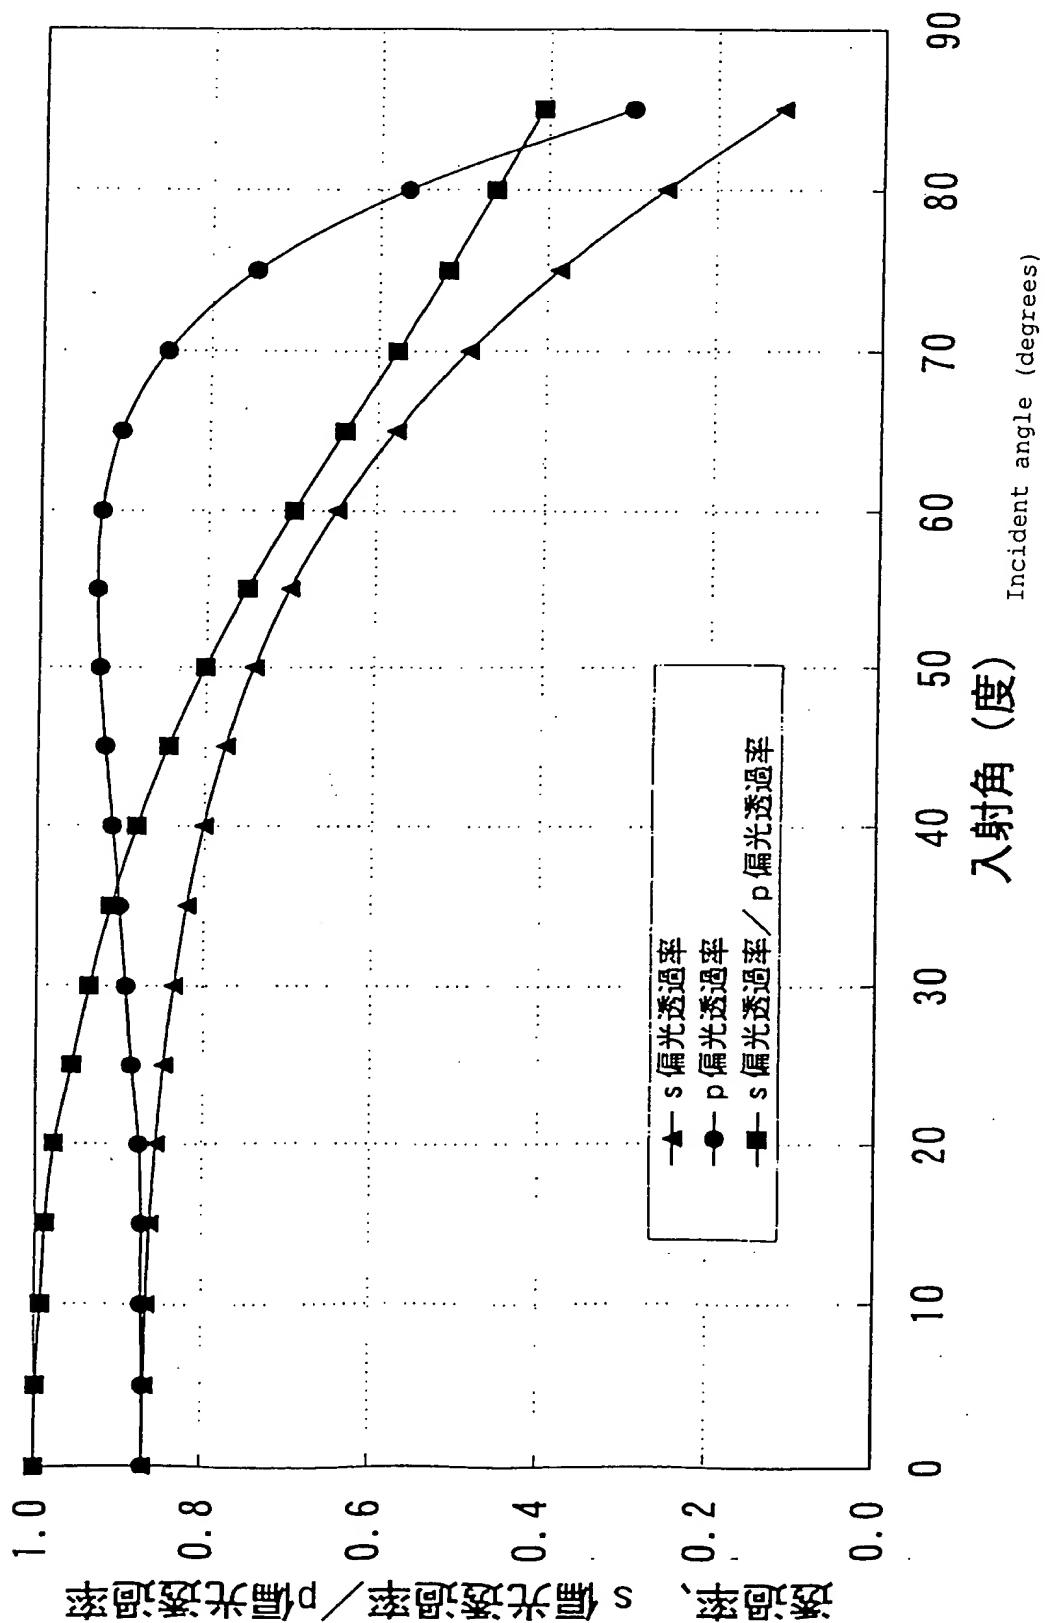

s-polarized light component transmittance

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light component transmittance

component transmittance

【図8】 Fig. 8

s-polarized light component transmittance

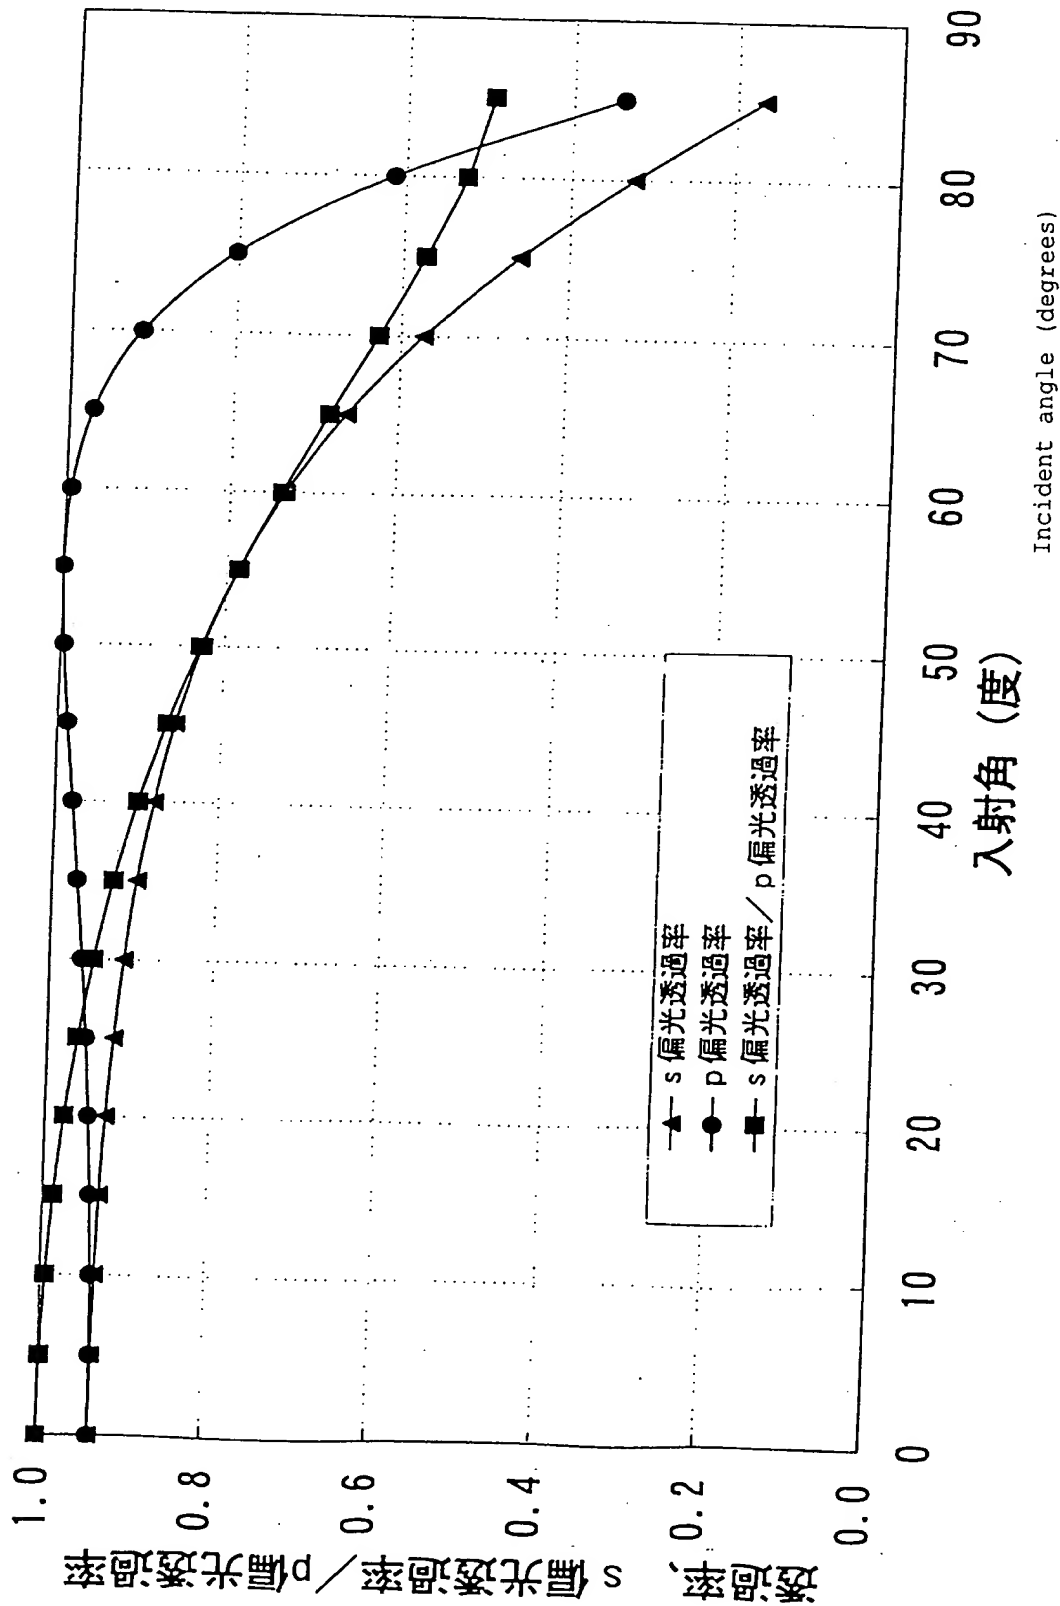

p-polarized light component transmittance

s-polarized light component transmittance/p-polarized light

component transmittance

【図9】 Fig. 9

s-polarized light component transmittance  
p-polarized light component transmittance  
s-polarized light component transmittance/p-polarized light  
component transmittance

transmittance, s-polarized light component  
transmittance/p-polarized light component transmittance
